An Impossibility Theorem for Clustering

An Impossibility Theorem for Clustering Jon Kleinberg Department of Computer Science Cornell University Ithaca NY 14853 Abstract Although the study of clustering is centered around an intuitively compelling goal, it has been very difficult to develop a unified framework for reasoning about it at a technical level, and pro-

6. Dynamic Programming

Linebreaking Second thought Instead of trying to solve subproblems for general (i, j) , solve only for (i, n) - $OPT(i, n) = \min$ penalty linebreaks for words i through n When called to linebreak, try all possibilities of breaking this line calling recursively to place the rest Only need to try $w/2$ possibilities for the linebreak Code (Assumes memoization is happening automatically)
