First of all the SIP Trunk must be configured. Since Colt authenticates a user account only by IP - Address, you cannot use the normal SIP-Gateway object. You need to configure a GW without registration and route the calls to the PBX. Make sure that Media Relay is activated and an exclusive codec is selected.

by carrying many signals at once to connect nodes in a communications system.

What is SIP Trunking? - Twilio

A "trunk" is a line or link that carries signals and connects nodes in a communications system - in other words, a pipe that carries the data channels inside it to connect two locations.
