Latex User Manual

Note that LATEX2" still understands the LATEX 2.09 \documentstyle command. This command causes LATEX2" to enter LATEX 2.09 compatibility mode, which is described in Section4. You should not, however, use the \documentstyle command for new documents because this compatibility mode is very slow and the new features of LATEX2" are not available in this mode.

LaTeX Templates

A user manual consists of textual visual information (illustrations, screenshots, tables etc.) to assist the user in completing specific tasks. The user plays the central role when drawing up a user manual. A well-drafted user manual only provides that information that is relevant for the intended user of the product.

User Manual Template and Guide to Create Your Own Manual ...

- You can use beamer with pdf_latex, latex+dvips, lua_latex and x_el_atex. latex+dvipdfm isn't supported (but we accept patches!).
- The standard commands of L_AT_EX still work. A `\tableofcontents` will still create a table of contents, `\section` is still used to create structure, and `\itemize` still creates a list.
